HOW TO FLOWER THESE EXOTICS

CHRYSANTHEMUM JAPONICUM

In a hothouse or frame you may sow the seed anytime, excepting hot summer months. The seeds can be sown as soon as frost is over, but not much later if you wish to see good flowers the same year. Sow the seed in pots or flats or in protected frame. Since the seeds are small, care must be exercised not to wash them away. In about two or three weeks the seeds will germinate. When they are large enough to be transplanted, the seedlings should be planted in trays or outdoors and they will come to bloom the same year if the flowers are protected from freezing. To get maximum results, disbudding is necessary as in the case of ordinary Large-fl Chrysanthemums. If you are looking for exhibition novelties pick up promising plants and grow them carefully the second year as Chrysanthemums will flower much finer if they are grown from cuttings. Contains many new varieties prized by professional collectors and fanciers.

SALEABLE in Market Paks of six or full grown flowering plants in 6" pots. Cost much less than from cuttings.
